

Come si compone una cabina Outdoor Carmenta? / How is a Carmenta Outdoor cabin constructed?

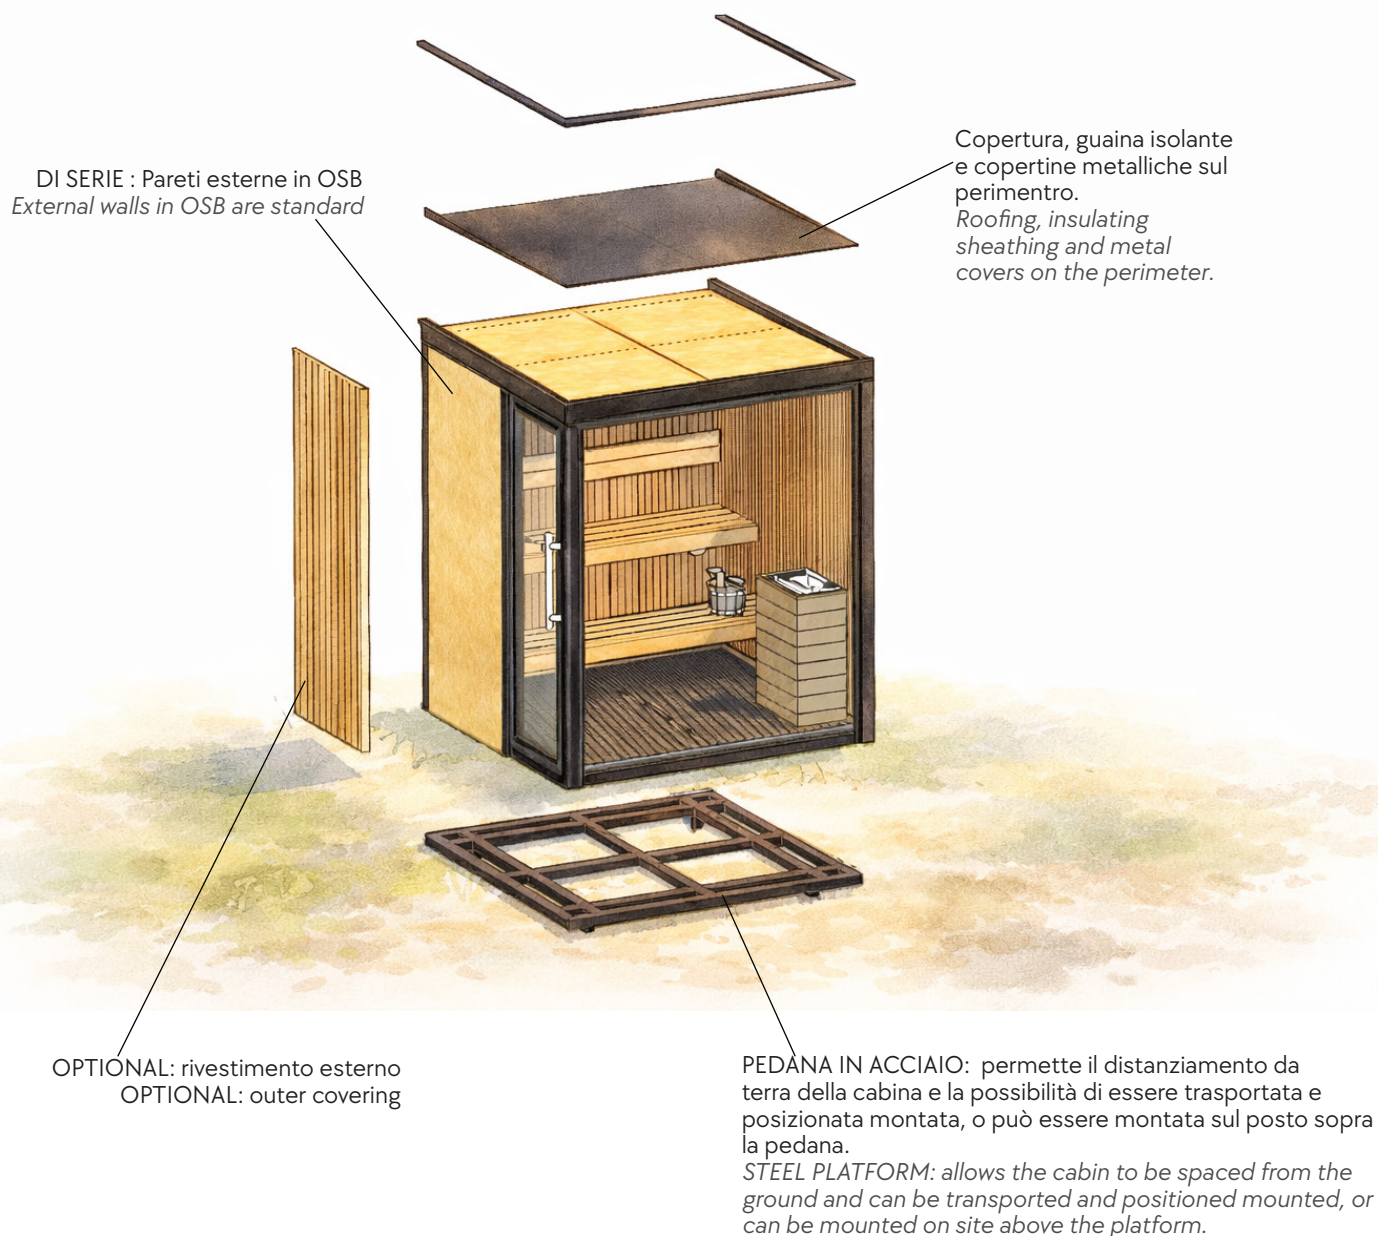

La cabina Outdoor Panorama è progettata con una struttura tecnica ad alte prestazioni, studiata per garantire stabilità, durabilità e isolamento in ambiente esterno. La base è costituita da una pedana strutturale in acciaio che consente il sollevamento da terra, migliorando la ventilazione inferiore e proteggendo la cabina dall'umidità. La struttura può essere consegnata assemblata e trasportata completa, oppure installata direttamente in loco.

Le pareti esterne sono realizzate in OSB, pronte per essere personalizzate dal cliente con rivestimenti esterni in legno, HPL o materiali del cliente. Il sistema di copertura prevede guaina impermeabilizzante e profili metallici perimetrali, garantendo protezione dagli agenti atmosferici e continuità strutturale nel tempo.

The Panorama Outdoor cabin is engineered with a high-performance technical structure designed to ensure stability, durability and insulation in outdoor environments.

The base consists of a structural steel platform that elevates the cabin from the ground, improving underfloor ventilation and protecting the structure from moisture. The unit can be delivered fully assembled and transported complete, or installed directly on site.

External walls are made of structural OSB panels, ready to be finished with optional exterior cladding in wood, HPL, or customer materials. The roofing system includes waterproof membrane and perimeter metal profiles, ensuring weather protection and long-term structural integrity.

Elementi standard / Standard elements

- Struttura portante costituita da montanti e traversi di Abete con materiale isolante
Load-bearing structure consisting of spruce uprights and beams with insulating material
- Rivestimento interno in legno, esterno in pannello OSB
Interior cladding in wood; exterior in OSB panel
- Panca e schienale in legno
Wooden bench and backrest
- Copristufa di protezione in legno
Protective wooden cover for the heater
- Riscaldatore elettrico con pietre per Sauna finlandese.
Electric heater with sauna stones for traditional Finnish sauna use
- Serramento alluminio con vetrocamera
Aluminium frame with double glazing
- Maniglione acciaio inox, con interno in legno.
Stainless steel handle with wooden grip
- Tastiera interna o esterna di comando.
Internal or external control panel
- Illuminazione LED RGB o bianco 2700 K
RGB LED lighting or white 2700 K
- Basamento pedana in acciaio trasportabile
Transportable steel platform base
- Basamento isolante con canali per passaggio corrugati e cavi, Pedana interna in legno amovibile
Insulated base with channels for the passage of corrugated pipes and cables, removable internal wooden platform
- Copertura inclinata con guaina e copertine
Sloping roof with sheathing and covers

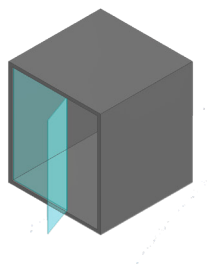

Optional / Optionals

- Secchiello, mestolo e clessidra
Bucket, ladle and hourglass
- Musica con collegamento Bluetooth e casse acustiche
Music with Bluetooth connection and speakers
- Genius, gestione remota della cabina **P. 48**
*Genius, remote cabin Management **P. 48***
- Tetto con rete riscaldata scioglineve e scioglighiaccio
Roof with a heater snow-melting and ice-melting net.
- Luci servizio
Cleaning light
- Rivestimento esterno in HPL o abete
External cladding in HPL or fir
- Led RGB o bianco su perimetro pedana in acciaio
RGB or white LED on the steel platform perimeter
- Finestre
Windows
- Pulsante d'emergenza
Emergency button
- Griglia di sicurezza
Safety grid
- Pulsante di accensione interno cabina
On/Off button inside the cabin
